

eScan2 – Gjenopprett etter oppgradering

Dette dokumentet forklarer hvordan du gjenoppretter eScan2 etter kræsj under oppgradering.

Hvis eScan2-oppgraderingen avbrytes, er det mulig at eScan2 ikke starter igjen. eScan2 inneholder en "bootloader". Dette betyr at programvare alltid kan gjenopprettes uansett hvordan den har kræsjet.

START ESCAN2 I BOOTLADER-MODUS

Når eScan2 starter opp, leser den PÅ-tasten. Hvis PÅ-tasten trykkes, vil eScan2 gå inn i bootloader-modus.

×

Kontroller at batteriet er ladet og USB ikke er tilkoblet. Ladeprosessen skjer selv om prosessoren ser ut til å ha krasjet.

Upgrade failed. Upgrade OK
- 1. Oppgraderingsprosessen har kræsjet.

2. eScan2 starter ikke:

4. Fjern det ene batteriet og vent ca 10 sek:

3. Koble fra USB-kabel og skru ut de fire skruene på baksiden:

 Trykk på ON-tasten og sett samtidig batteriet på plass (USB må være frakoblet!)

6. Start eUpgrade. eScan2 skal vises etter noen sekunder. Serienummeret skal være 857200000 med et programvare-versjonsnummer.
